Thank you for your interest!

The PureWick™ System is an innovative option to managing urinary incontinence. The system works outside the body to draw urine away, helping to keep skin dry.

Simple and non-invasive, the PureWick™ Female External Catheter effectively draws urine away from the body through soft material. It can be used while lying down on the back or side, or seated in a reclined position. Already used in over 2,000 U.S. hospitals, it's now available for home use.

We’re excited to make this available to you. The PureWick™ System is in stock and ready to ship!

To learn more or to place an order, call a PureWick™ Specialist at 866-326-5177!

Sincerely,

Your PureWick™ Team
**Indication:** The PureWick™ Female External Catheter used with the PureWick™ Urine Collection System is intended for non-invasive urine output management in female patients.

**Contraindication:** Do not use the PureWick™ Urine Collection System with PureWick™ Female External Catheters on individuals with urinary retention.

**Warnings:**
- To avoid potential skin injury, never push or pull the PureWick™ Female External Catheter against the skin during placement or removal.
- Never insert the PureWick™ Female External Catheter into the vagina, rectum, or any other body cavity.
- Do not use the PureWick™ Female External Catheter with a bedpan or any material that does not allow for sufficient airflow.
- Discontinue use if allergic reaction occurs. Not recommended for users who are experiencing skin irritation or skin breakdown in device contact areas. Please consult package insert for more detailed safety information and instructions for use.

**BD PureWick™ System**
The BD PureWick™ System provides an alternative method that may help women living with urinary incontinence.

Multiple diaper changes at night

The PureWick™ Female External Catheter

The non-invasive wick draws urine away from the body. It can be used while lying on the back or side, or seated in a reclined position.

The Collection Canister

The collection canister sits securely in the PureWick™ Urine Collection System. An optional privacy cover slips over the collection canister.

Works Outside the Body

Aligns against pubic bone
Made of soft and flexible material with fabric
A low pressure vacuum wicks urine away from the body into a sealed collection canister
Tucks snugly between gluteus muscles

Directions for use
BD Pure Wick™ Urine Collection System and Pure Wick™ Female External Catheter

BD PureWick™ Urine Collection System setup

1. Plug power cord into device outlet and into the A/C power outlet. Note: Make sure the power switch is turned off.
2. Place collection canister in the base and press down firmly on the lid of the device making sure lid is sealed.
3. Optional: Slip privacy cover onto the canister prior to placing canister into base.
4. Attach pump tubing (short tube) to the PureWick™ Urine Collection System connector port and the connector port on the collection canister lid.
5. Attach the elbow connector to the collector tubing (long tube) and connect elbow connector to the connector port on collection canister lid.
6. Connect other end of collector tubing (long tube) to a PureWick™ External Catheter.

PureWick™ Female External Catheter placement

7. A. Perform perineal care and assess skin integrity

B. Separate legs, gluteus muscles and labia. Palpate by using pubic bone as anatomical marker

8. A. With soft gauze side facing patient, align distal end at gluteal cleft.

B. Gently tuck soft gauze side between separated gluteus and labia.

PureWick™ Female External Catheter removal and maintenance

9. Fully separate the legs, gluteus, and labia.

A. To avoid potential skin injury upon removal, gently pull the PureWick™ Female External Catheter directly outward

B. Ensure suction is maintained to draw urine out of the collector tubing and into the collection canister before removing the PureWick™ Female External Catheter.

10. Replace at least every 8-12 hours or if soiled with feces or blood. Assess skin for compromise and perform perineal care prior to placement of a new PureWick™ Female External Catheter.

See reverse side for indications, contraindications, safety and warnings.

Indications: The PureWick™ Urine Collection System is to be used with the PureWick™ External Catheters which are intended for non-invasive urine output management.

Contraindications: Do not use the PureWick™ Urine Collection System with PureWick™ Female External Catheters on individuals with urinary retention.

Warnings: Do not use the PureWick™ Female External Catheter with bedpan or any material that does not allow for sufficient airflow. To avoid potential skin injury, never push or pull the PureWick™ Female External Catheter against the skin during placement or removal. Never insert the PureWick™ Female External Catheter into vaginas, anal canal, or other body cavities. Do not attempt to enlarge or extend insertion. After use, the product may be sanitized beforehand. Dispose of in accordance with applicable local, state and federal laws and regulations.

Precautions: Not recommended for patients who are: Agitated, combative, uncooperative and might remove the PureWick™ Female External Catheter. Having frequent episodes of bowel incontinence without a fecal management system in place. Experiencing skin irritation or breakdown at the site. Experiencing ostomy leakage/feuery or irrigation. Current chemotherapy or radiation therapy. Experiencing skin breakdown or irritation at the site of catheter placement. Experiencing moderate/heavy menstruation and cannot use tampons. Do not use or dispose of the PureWick™ Urine Collection System in the toilet. CAUTION: Improper placement of the catheter may result in discomfort or skin irritation in patients who have undergone recent surgery of the external urogenital tract.

Safety and Warnings: Always unplug PureWick™ Urine Collection System before cleaning or when not in use. Do not immerse the PureWick™ Urine Collection System in water. As with most electrical devices, electrical parts in this system are electrically live even when the power is off. To avoid potential skin injury, never push or pull the PureWick™ Female External Catheter against the skin during placement or removal. Never insert the PureWick™ Female External Catheter into vaginas, anal canal, or other body cavities. Do not attempt to enlarge or extend insertion. After use, the product may be sanitized beforehand. Dispose of in accordance with applicable local, state and federal laws and regulations.

To reduce the risk of electrical shock or injury, do not disassemble this unit. No modification of this equipment is allowed.
